## Summary

### About this Release

Related to: 1364.0.15.001

The Modellers' Database consists of over 500 quarterly times series constructed from the NIF and TRYM econometric models. They are useful to economists, econometricians, financial analysts and students. The database covers national accounts, banking and investment, price indexes, interest rates, world data, population and labour statistics and wage and tax rates. Some of the time series are published elsewhere by ABS while others are specifically constructed for the TRYM and NIF models. For most series the data span is between 20 and 25 years.
